## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. There must have been a typo, claim 2 is stated to depend on itself.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshimura.

The patent by Yoshimura (JP 06093856 A) shows an engine with a cooling circulation and at least one line having a cooling liquid being intermittently deionized (1).

The cooling liquid is deionized by an ion exchanger (1).

### ***Claim Rejections - 35 USC § 103***

Claims 4, 5, and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura.

The patent by Yoshimura does not specify the type of ion exchanger, it is the view of the examiner that the type of ion exchanger is an obvious choice of design

Art Unit: 3747

because no new or unexpected results are achieved by either of the ion exchanger types.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent by Peters et al. (4,404,113) specifically is relevant to the type of coolant fluid.
